

DOPS assessment results – colonoscopy

The table below shows the pass/fail percentages for each individual item on DOPS forms from 2018 to end of May 2020.

Candidates most frequently failed on areas relating to tip control, proactive problem solving, loop management, pace and progress, and visualisation.

Please review the full [DOPS assessment form](#) to help guide you as to what the assessors will be looking for in each of these areas, as this will help you prepare for your assessment. If you undertake polypectomy during your assessment, then your polypectomy skills will be assessed using the [DOPyS assessment](#) form.

Section/ item	% pass	% fail	% n/a
Pre-procedure	98%	1%	1%
Indication	99%	0%	1%
